

Parametrix No. 314-4875-001 – Task 02.145

Cynda Herrick, AICP, CFM
Valley County Planning and Zoning Director
219 North Main Street
PO Box 1350
Cascade, ID 83611

Re: Donnelly Storage Facility – Revised Grading and Drainage Plans and Stormwater Drainage Report

Dear Cynda:

We have reviewed the above-referenced documents against the current Valley County (VC) Private and Public Road standards. Per our review and in coordination with the owner/engineer, the plans and stormwater calculations meet the required standards; therefore, we are recommending approval of the documents.

Please contact me with any questions or comments.

Sincerely,

PARAMETRIX
Valley County Engineer

Paul Ashton, PE

Valley County Road and Bridge Director
520 South Front Street
P.O. Box 672
Cascade, ID 83611

Re: May 14, 2026, Planning and Zoning Commission Agenda Items

Dear Kerstin:

We have reviewed the items listed on the May 14, 2026, Valley County (VC) Planning and Zoning Commission agenda and have the following comments for your consideration:

Old Business:

1. **SUB 25-003 Tamarack Resort Phase 3.7 Buttercup Villas – Final Plat**
Not reviewed (No information attached).
2. **C.U.P. 24-24 Gold Fork River Ranch Phase 1 – Final Plat**
Not reviewed (No information attached).

New Business:

1. **VAR 26-001 Walcom Setback Variance**
Not reviewed.
2. **VAR 26-002 Koskella Shared Driveway Variance**
Not reviewed.
3. **C.U.P. 26-004 Maxton Short-Term Rental**
Not reviewed.
4. **SUB 26-004 Orange Sky Subdivision – Preliminary Plat**

Detailed site grading and drainage plans and drainage design documentation signed by a licensed PE for the site improvements may be required for review and approval by the Valley County engineer. Additional stormwater resulting from site improvements will need to be retained on site and addressed in the design and calculations. Improvements to offsite drainage features may be required. Appropriate temporary and permanent best management practices (BMPs) and erosion control measures are required to protect adjacent properties, waterways, and roadway ditches.

All proposed driveway connections to public roads within the development shall meet the criteria outlined in the Valley County Minimum Standards for Private/Public Road Design and Construction

A traffic impact study is not required for this 2-lot subdivision; however, a development agreement identifying public road impacts may be required.

5. SUB 26-005 Pine Creek Ranck South Subdivision – Preliminary Plat

Preliminary plans were included with the CUP application, but detailed site grading and drainage plans and drainage design documentation signed by a licensed PE for the site improvements will be required for review and approval by the Valley County engineer. Additional stormwater resulting from site improvements will need to be retained on site and addressed in the design and calculations. Improvements to offsite drainage features may be required. Appropriate temporary and permanent best management practices (BMPs) and erosion control measures are required to protect adjacent properties, waterways, and roadway ditches.

All proposed roads within the development shall meet the criteria outlined in the Valley County Minimum Standards for Private/Public Road Design and Construction. Stockton Boulevard and Pine Creek Ranch Drive are currently shown as public roads within 80-foot rights-of-way. However, standard local roads and minor collectors require only 70 feet of right-of-way. If 80 feet is provided, a minimum of 35 feet should be dedicated on at least one side of the roadway.

A development agreement may not be required at this time but should be when the property is subdivided into lots.

6. C.U.P. 22-34 Shoemaker Donnelly Storage – Extension Request

Extension request. Original CUP conditions and review apply.

7. C.U.P. 26-006 Tree Equipment Storage and Employee Housing

Detailed site grading and drainage plans and drainage design documentation signed by a licensed PE for the site improvements will be required for review and approval by the Valley County engineer. Additional stormwater resulting from site improvements will need to be retained on site and addressed in the design and calculations. Improvements to offsite drainage features may be required. Appropriate temporary and permanent best management practices (BMPs) and erosion control measures are required to protect adjacent properties, waterways, and roadway ditches.

Valley County requires a 100-foot setback from ITD ROW for any permanent structures. Coordinate with ITD for access off SH-55.

8. C.U.P. 18-10 Garcia/Fredriks Multiple Residence – Extension Request

Extension request. Original CUP conditions and review apply.

9. C.U.P. 26-007 Fish and Game Office and Employee Housing

Preliminary plans were included with the CUP application, but detailed site grading and drainage plans and drainage design documentation signed by a licensed PE for the site improvements will be required for review and approval by the Valley County engineer. Additional stormwater resulting from site improvements will need to be retained on site and addressed in the design and calculations. Improvements to offsite drainage features may be required. Appropriate temporary and permanent best management practices (BMPs) and erosion control measures are required to protect adjacent properties, waterways, and roadway ditches.

There appear to be designated wetlands on the property. The applicant will need to delineate existing wetlands to confirm that there are no wetland impacts. If wetlands are impacted, the project may require approval of the U.S. Army Corps of Engineers under the federal Clean Water Act.

Valley County requires a 100-foot setback from ITD ROW for any permanent structures. Coordinate with ITD for access off SH-55.

10. SUB 25-019 Rocky Mountain Storage – Preliminary Plat

Preliminary plans were included with the CUP application, but detailed site grading and drainage plans and drainage design documentation signed by a licensed PE for the site improvements will be required for review and approval by the Valley County engineer. Additional stormwater resulting from site improvements will need to be retained on site and addressed in the design and calculations. Improvements to offsite drainage features may be required. Appropriate temporary and permanent best management practices (BMPs) and erosion control measures are required to protect adjacent properties, waterways, and roadway ditches.

All proposed roads within the development shall meet the criteria outlined in the Valley County Minimum Standards for Private/Public Road Design and Construction.

A Traffic Impact Study and mitigation of visual impacts are required for this project.

Wetland areas are delineated on the plan as “no build” areas. If wetlands are impacted, the project may require approval of the U.S. Army Corps of Engineers under the federal Clean Water Act.

Please contact me if you have any questions.

Sincerely,

Parametrix

Paul Ashton, PE

☒ Valley County

Rezone # _____

Conditional Use # CUP 22-34 Shoemaker Donnelly Storage

Preliminary / Final / Short Plat _____

- ☐ 1. We have No Objections to this Proposal.
- ☐ 2. We recommend Denial of this Proposal.
- ☐ 3. Specific knowledge as to the exact type of use must be provided before we can comment on this Proposal.
- ☐ 4. We will require more data concerning soil conditions on this Proposal before we can comment.
- ☐ 5. Before we can comment concerning individual sewage disposal, we will require more data concerning the depth of:
☐ high seasonal ground water ☐ waste flow characteristics
☐ bedrock from original grade ☐ other _____
- ☐ 6. This office may require a study to assess the impact of nutrients and pathogens to receiving ground waters and surface waters.
- ☐ 7. This project shall be reviewed by the Idaho Department of Water Resources concerning well construction and water availability.
- ☐ 8. After written approvals from appropriate entities are submitted, we can approve this proposal for:
☐ central sewage ☐ community sewage system ☐ community water well
☐ interim sewage ☐ central water
☐ individual sewage ☐ individual water
- ☐ 9. The following plan(s) must be submitted to and approved by the Idaho Department of Environmental Quality:
☐ central sewage ☐ community sewage system ☐ community water
☐ sewage dry lines ☐ central water
- ☐ 10. Run-off is not to create a mosquito breeding problem
- ☐ 11. This Department would recommend deferral until high seasonal ground water can be determined if other considerations indicate approval.
- ☐ 12. If restroom facilities are to be installed, then a sewage system MUST be installed to meet Idaho State Sewage Regulations.
- ☐ 13. We will require plans be submitted for a plan review for any:
☐ food establishment ☐ swimming pools or spas ☐ child care center
☐ beverage establishment ☐ grocery store
- ☒ 14. CDH has no objection to the CUP extension. The septic application on file for this property will expire 12/11/27 and will cost \$94.00, at this time, to review.

Subject: Valley County May 14 2026 Letter Response

Dear Lori Hunter:

Thank you for the opportunity to respond to your request for comment. While DEQ does not review every project on a project-specific basis, we attempt to provide the best review of the information provided. DEQ encourages agencies to review and utilize the Idaho Environmental Guide to assist in addressing project-specific conditions that may apply. This guide can be found at: <https://www2.deq.idaho.gov/admin/LEIA/api/document/download/15083>.

The following information does not cover every aspect of this project; however, we have the following general comments to use as appropriate:

1. AIR QUALITY (C1, C2, D4)

- Please review IDAPA 58.01.01 for all rules on Air Quality, especially those regarding fugitive dust (58.01.01.651), and trade waste burning (58.01.01.600-617).
- For new development projects, all property owners, developers, and their contractors must ensure that reasonable controls to prevent fugitive dust from becoming airborne are utilized during all phases of construction activities per IDAPA 58.01.01.651.
- DEQ recommends the city/county require the development and submittal of a dust prevention and control plan for all construction projects prior to final plat approval. Dust prevention and control plans incorporate appropriate best management practices to control fugitive dust that may be generated at sites.
- Citizen complaints received by DEQ regarding fugitive dust from development and construction activities approved by cities or counties will be referred to the city/county to address under their ordinances.
- Per IDAPA 58.01.01.600-617, the open burning of any construction waste is prohibited. The property owner, developer, and their contractors are responsible for ensuring no prohibited open burning occurs during construction.
- For questions, contact David Luft, Air Quality Manager, at (208) 373-0550.

2. WASTEWATER AND RECYLED WATER

- DEQ recommends verifying that there is adequate sewer to serve this project prior to approval. Please contact the sewer provider for a capacity statement, declining balance report, and willingness to serve this project.
- IDAPA 58.01.16 and IDAPA 58.01.17 are the sections of Idaho rules regarding wastewater and recycled water. Please review these rules to determine whether this or future projects will require DEQ approval. IDAPA 58.01.03 is the section of Idaho rules regarding subsurface disposal of wastewater. Please review this rule to determine whether this or future projects will require permitting by the local public health district.
- All projects for construction or modification of wastewater systems require preconstruction approval. Recycled water projects and subsurface disposal projects require separate permits as well.
- DEQ recommends that projects be served by existing approved wastewater collection systems or a centralized community wastewater system whenever possible. Please contact DEQ to discuss potential for development of a community treatment system along with best management practices for communities to protect groundwater.
- DEQ recommends that cities and counties develop and use a comprehensive land use management plan, which includes the impacts of present and future wastewater management in this area. Please schedule a meeting with DEQ for further discussion and recommendations for plan development and implementation.
- For questions, contact Valerie Greear, Water Quality Engineering Manager at (208) 373-0459.

3. DRINKING WATER

- DEQ recommends verifying that there is adequate water to serve this project prior to approval. Please contact the water provider for a capacity statement, declining balance report, and willingness to serve this project.
- DEQ recommends verifying if the current and/or proposed drinking water system is a regulated public drinking water system. A drinking water system is a Public Water System (PWS) if it has at least 15 service connections or regularly serves an average of 25 or more people per day for at least 60 days per year (refer to the DEQ website at: <https://www.deq.idaho.gov/water-quality/drinking-water/>). For non-regulated systems, DEQ recommends annual testing for total coliform bacteria, nitrate, and nitrite.
- IDAPA 58.01.08 is the section of Idaho rules regarding public drinking water systems. Please review these rules to determine whether this or future projects will require DEQ approval.
- All projects for construction or modification of public drinking water systems require preconstruction approval.
- If any private wells will be included in this project, we recommend that they be tested for total coliform bacteria, nitrate, and nitrite prior to use and retested annually thereafter.
- DEQ recommends using an existing drinking water system whenever possible or construction of a new community drinking water system. Please contact DEQ to discuss this project and to explore options to both best serve the future residents of this development and provide for protection of groundwater resources.
- DEQ recommends cities and counties develop and use a comprehensive land use management plan which addresses the present and future needs of this area for adequate, safe, and sustainable drinking water. Please schedule a meeting with DEQ for further discussion and recommendations for plan development and implementation.
- For questions, contact Valerie Greear, Water Quality Engineering Manager at (208) 373-0459.

4. SURFACE WATER

- Please contact DEQ to determine whether this project will require an Idaho Pollutant Discharge Elimination System (IPDES) Permit. A Multi-Sector General Permit from DEQ may be required for facilities that have an allowable discharge of storm water or authorized non-storm water associated with the primary industrial activity and co-located industrial activity.
- For questions, contact Emily Montague, IPDES Compliance Supervisor, at (208) 373-0433.
- If this project is near a source of surface water, DEQ requests that projects incorporate construction best management practices (BMPs) to assist in the protection of Idaho's water resources. Additionally, please contact DEQ to identify BMP alternatives and to determine whether this project is in an area with Total Maximum Daily Load stormwater permit conditions.
- The Idaho Stream Channel Protection Act requires a permit for most stream channel alterations. Please contact the Idaho Department of Water Resources (IDWR), Western Regional Office, at 2735 Airport Way, Boise, or call (208) 334-2190 for more information. Information is also available on the IDWR website at:
<https://idwr.idaho.gov/streams/stream-channel-alteration-permits.html>
- The Federal Clean Water Act requires a permit for filling or dredging in waters of the United States. Please contact the US Army Corps of Engineers, Boise Field Office, at 10095 Emerald Street, Boise, or call 208-345-2155 for more information regarding permits.
- For questions, contact Lance Holloway, Surface Water Manager, at (208) 373-0564.

5. **SOLID WASTE, HAZARDOUS WASTE AND GROUNDWATER CONTAMINATION**

- **Solid Waste.** No trash or other solid waste shall be buried, burned, or otherwise disposed of at the project site. These disposal methods are regulated by various state regulations including Idaho's Solid Waste Management Regulations and Standards (IDAPA 58.01.06), Rules and Regulations for Hazardous Waste (IDAPA 58.01.05), and Rules and Regulations for the Prevention of Air Pollution (IDAPA 58.01.01). Inert and other approved materials are also defined in the Solid Waste Management Regulations and Standards.
- **Hazardous Waste.** The types and number of requirements that must be complied with under the federal Resource Conservation and Recovery Act (RCRA) and the Idaho Rules and Standards for Hazardous Waste (IDAPA 58.01.05) are based on the quantity and type of waste generated. Every business in Idaho is required to track the volume of waste generated, determine whether each type of waste is hazardous, and ensure that all wastes are properly disposed of according to federal, state, and local requirements.
- **Water Quality Standards.** Site activities must comply with the Idaho Water Quality Standards (IDAPA 58.01.02) regarding hazardous and deleterious-materials storage, disposal, or accumulation adjacent to or in the immediate vicinity of state waters (IDAPA 58.01.02.800); and the cleanup and reporting of oil-filled electrical equipment (IDAPA 58.01.02.849); hazardous materials (IDAPA 58.01.02.850); and used-oil and petroleum releases (IDAPA 58.01.24.060 and 58.01.24.061). Petroleum releases must be reported to DEQ in accordance with IDAPA 58.01.24.060.01 and 58.01.24.061.04. Hazardous material releases to state waters, or to land such that there is likelihood that it will enter state waters, must be reported to DEQ in accordance with IDAPA 58.01.02.850.
- **Groundwater Contamination.** DEQ requests that this project comply with Idaho's Ground Water Quality Rules (IDAPA 58.01.11), which states that "No person shall cause or allow the release, spilling, leaking, emission, discharge, escape, leaching, or disposal of a contaminant into the environment in a manner that causes a ground water quality standard to be exceeded, injures a beneficial use of ground water, or is not in accordance with a permit, consent order or applicable best management practice, best available method or best practical method."
- For questions, contact Matthew Pabich, Waste & Remediation Manager, at (208) 373-0510.

6. ADDITIONAL NOTES

- If an underground storage tank (UST) or an aboveground storage tank (AST) is identified at the site, additional regulations may apply. If an UST is present, the site should be evaluated to determine whether the UST is regulated by DEQ. If an AST is identified, EPA may have additional requirements. Both UST and AST sites should be assessed to determine whether there is potential soil and ground water contamination. Please call DEQ at (208) 373-0550, or visit the DEQ website <https://www.deq.idaho.gov/waste-management-and-remediation/storage-tanks/leaking-underground-storage-tanks-in-idaho/> for assistance. If applicable to this project, DEQ recommends that BMPs be implemented for any of the following land uses: wash water from cleaning vehicles, fertilizers and pesticides, animal facilities, composted waste, ponds and outdoor gun ranges. Please contact DEQ for more information on any of these conditions.

We look forward to working with you in a proactive manner to address potential environmental impacts that may be within our regulatory authority. If you have any questions, please contact me, or any of our technical staff at (208) 373-0550.

Sincerely,

Development Application	CUP 22-34
Project Name	Shoemaker Storage
Project Location	13051 Old State Rd
Project Description	Public Self-Storage
Applicant	Jeff Hatch; Hatch Design Architecture

The Idaho Transportation Department (ITD) reviewed the referenced application(s) and has the following comments:

1. The Department does not have any concerns with applicant's request for a three-year extension.
2. Prior to permitting, the applicant may need to provide an updated traffic study as conditions will inherently change.
3. ITD reserves the right to make further comments upon review of the submitted documents.

If you have any questions, you may contact me at 208-334-8377.
